

Our dynamically growing actuarial department is looking for new **Actuarial Manager/ Actuarial Senior Manager** into our **cash-flow modelling team** in Big4 environment.

The company's Clients rely on our actuarial department in many cases, starting with audits (assessment of technical provisions adequacy for IFRS and Solvency II purposes, recalculation of reserves and solvency capital requirements) through calculation of employee benefits and pension payments, valuation of insurance companies (embedded value and other models) and many other areas. We provide help to our domestic and international Clients.

If you are interested in actuarial studies and/or general modeling or programming moreover if you want to get to know various areas and insurance companies in different locations across Europe, this is the perfect place for you.

- Opportunities to increase your insurance business understanding through participation in **local and international** projects to learn **different insurance companies, products and foreign markets**
- Participation in various actuarial modelling projects and **opportunity to further enhance modelling skills**
- Rapid knowledge development through on-the-job training and participation in **actuarial trainings and conferences in Hungary and abroad**, possibility for **secondment in Europe**
- **Motivated team** and endless opportunities of **company events**: skiing, happy hours, Christmas party, summer teambuilding etc.
- Opportunities to increase your **people management** skills
- Competitive salary including a **wide range of benefits**, as: the most advanced mobile phone, office massage & yoga, health and sport programs
- Attractive and modern working environment with great location in the heart of Budapest

Required professional background and skills:

- Graduated in **Actuarial Science**
- Strong command of spoken and written **Hungarian and English**
- **Excellent MS Office** knowledge (Excel, Word, Power Point)
- Strong **analytical and / or modelling skills**
- **Flexible way of thinking** and working
- **Team player** attitude but also capability to **work independently**
- **Good understanding of** structure, features and financial aspects of **life insurance products**
- **Experience in life cash-flow modelling** technics and in at least actuarial cash-flow modelling software solution (e.g. Prophet, Risk Agility, AFM)
- 5+ year relevant professional **experience** gained in **consulting / insurance industry**

We consider as an advantage:

- German language knowledge
