

Your future company

NN RAS (Risk and Actuarial Services) is a Centre of Excellence for NN Group, focusing on top quality and efficient solutions. We serve as an internal centre of quantitative model development, automation and innovation. We support numerous departments at NN Head Office in the Hague (the Netherlands) and NN subsidiaries all over Europe.

Now we are hiring to extend our **Software and Data Engineering team** with a **Python Developer**.

What matters to you

- Combining actuarial knowledge with coding
- Building things from scratch (we hardly have legacy code) Development and maintenance of codebases in Python
- Working in an agile developer team
- DevOps mindset
- Working with Pandas

What matters to us

- Actuarial knowledge
- Experience in Python development

What you will get in return

- NN RAS is not providing you a job, but an environment to give your innovation ideas in software engineering a route at a huge insurance company, having inexhaustible fields to develop
- Challenging projects within an exciting multinational, yet familiar work environment
- Competitive compensation package
- Opportunity to work from home or the office- it is fully your choice
- Plenty of opportunities to develop yourself: skills and personal development are high priorities at NN RAS
- We care for employee satisfaction with high levels of empowerment, plenty of development opportunities, focus on healthy work-life balance and modern working conditions

Are you ready? Apply to us on the following link [Careers \(myworkdayjobs.com\)](https://myworkdayjobs.com) and be part of the NN RAS team!
